

Secomea signs OEM agreement with INSYS Microelectronics

Regensburg, 30. September 2009

Regensburg – Secomea A/S, one of the market leaders on Remote Device Management for the automation industry, announces today a strategic partnership with INSYS Microelectronics GmbH.

The Remote Device Management solution from Secomea A/S lets machine builders utilise the benefits of the high speed internet for remote service and support, using state-of-the-art security for both end-customers and themselves, but without the complexity previously experienced.

“The OEM agreement with INSYS Microelectronics GmbH gives us a new hardware platform for our SiteManagers in both wired and wireless industrial environments. Providing an industrial class housing and DIN mounting capabilities, the new hardware fits perfectly into the market requirement to be a standard component in all machines that can benefit from remote service and support” said Michael Ferdinandsen, Sales Director, Secomea A/S.

“We are proud of the OEM agreement with INSYS Microelectronics GmbH as a high quality hardware platform supplier”, said Michael Ferdinandsen. “INSYS Microelectronics GmbH is a well established company with expert knowledge and experience in hardware solutions for industrial automation.”

“INSYS Microelectronics is excited to become a hardware supplier to Secomea”, said Christian Kullen, International Sales Director, INSYS Microelectronics GmbH. The Remote Device Management solution from Secomea A/S provides a leading technology for remote service and support to the Industrial automation. This partnership fits perfectly into our business strategy of being a leading hardware manufacturer”, he continued.
